The screenshot displays the IBM Db2 on Cloud web interface. On the left, the 'Data objects' panel shows a database named 'TBB62086'. The main area is titled 'My script' and contains a SQL script in a text editor. The script includes commands to create a table, insert data, update a record, delete a record, and select all records. Below the script editor, the 'History' panel shows a table of executed scripts with columns for Script, Date, Status, and Runtime.

Script	Date	Status	Runtime
